PERSONAL PROFILE

Operations professional and Industrial Engineering graduate with over two years in U.S. restaurant-technology operations, ERP rollout and workflow automation. Leads a four-person team taking 6–7 restaurants live each week, with zero churn across 12 go-lives; raised on-time payroll from 50–60% to 95% and cut open support tickets by 35%. Seeking an operations, implementation or business analyst role.

KEY SKILLS

Operations: Process Improvement, Implementation & Go-Live, Quality Assurance, SOP Development, KPI Reporting, Stakeholder Management, Team Leadership

Business Analysis & Systems: Requirements Gathering, Process Mapping, User Acceptance Testing (UAT), Data Migration, ERPNext, POS Systems

Tools: Advanced Excel, Google Sheets, Jira, Asana, Python, GitHub, Claude Code, Shopify, GoHighLevel, Hubstaff

CAREER HISTORY

AIO App (Restaurant Management Technology)

Islamabad, Pakistan

Senior Operations Associate

August 2026 – Present

- Own end-to-end delivery of 6–7 new restaurant accounts per week from post-onboarding through go-live, leading a four-person team through work assignment, training and quality review.
- Take each restaurant live within 2–3 weeks across menu, payroll, catering (where required), marketing, inventory and third-party delivery platforms (DoorDash, Uber Eats, Grubhub).
- Serve as primary owner and escalation point for assigned demo and live restaurant environments; personally manage key accounts.
- Took 12 restaurants live with zero churn to date; resolved menu issues for at-risk accounts to support retention.
- Own pre-launch QA across POS, kiosks, online ordering and KitchenHub integrations, confirming every restaurant is fully functional before go-live.
- Lead requirements for a new Catering Module: research U.S. catering workflows, document required features and define the module structure in meetings with product managers.
- Built and maintain a web-based dashboard, deployed on company servers, tracking 72 prospect demo accounts and giving sales and leadership real-time visibility of demo status.

Operations Associate

October 2025 – August 2026

- Raised on-time payroll completion from 50–60% to 95% across 19 restaurants by building a web-based payroll dashboard with automated alerts for pay cycles, paydays, approval deadlines and time-zone conversions.
- Cut average menu creation time from 6–7 hours to 2–4 hours by researching use cases and writing feature requests that drove a full revamp of the company's menu management tool.
- Reduced open support tickets by 35% (320 to 208) by building a live Jira dashboard segmenting bugs and feature requests by priority, status, module, product and assignee for priority-based resolution.
- Designed and coded a pizza-ordering interface with real-time visual configuration, integrated across POS, kiosk and online ordering with product and engineering teams; pizza clients grew from 3 to 12 after launch.
- Delivered daily operational support for POS, kiosk, digital ordering, menu, payment, payroll, inventory and marketing for California-based restaurant brands across U.S. time zones; onboarded and trained three interns.

Coopable (Automotive Co-op Reimbursement Services)

Remote

Financial Reporting & Billing Operations Associate (Part-Time Contract)

November 2025 – August 2026

- Produced and validated 8–10 daily Excel-based financial and invoice reports covering billing, payments, claims and marketing funds for 350 U.S. automotive dealerships, delivered on schedule while the dealership base grew 38%.
- Built monthly and quarterly claims and marketing-fund forecasts by dealership using XLOOKUP, SUMIF and moving averages; analysed claims by vendor to identify vendors yet to submit claims.
- Reconciled reports and resolved discrepancies, variances and data-quality issues before submission; documented end-to-end reporting and billing workflows for consistency and knowledge transfer.

OneScreen (Interactive Display Technology)

Islamabad, Pakistan

Supply Chain Analyst

August 2025 – October 2025

- Cut approval cycle time from approximately five hours to one to three hours by building an n8n and Python workflow automation.
- Supported the ERPNext production rollout for five supply chain users across inventory, stock, payroll, shipping, tracking, roles and permissions, and workflow controls.
- Executed data migration, user acceptance testing (UAT), system testing and end-user training; configured and tested server scripts for deadlines, reminders, submissions and missing-document checks.
- Coordinated five regional vendors to 95% on-time delivery and maintained Shopify catalogues for U.S. online ordering.

SkilledForce (Remote Talent Solutions)

Islamabad, Pakistan

Operations Lead

December 2024 – August 2025

- Managed 10 full-time direct reports delivering LinkedIn, CV development and networking services to 62 active U.S. clients at a company of approximately 40 employees; reported to the COO.
- Increased tasks completed per week by 32% between March and June 2025 by introducing workload allocation, KPI monitoring and weekly reporting through GoHighLevel and Hubstaff.
- Reduced departmental operating expenses by 15% by eliminating redundant software subscriptions and managing budgeting and reconciliation in Excel.

Facto Investments (Financial Services)

Istanbul, Türkiye

Investments Associate

May 2024 – August 2024

- Prepared client presentations from senior analysts' market research and indicator-based trading analysis.
- Presented findings to three client accounts alongside senior staff and managed follow-up communication on account activity.

The Phoenix Practice (Dental Practice)

Islamabad, Pakistan

Business Analyst Intern

June 2023 – August 2023

- Modelled pricing, discount and service-cost scenarios in Python for a newly launched dental clinic, identifying a more sustainable balance between customer-acquisition offers and profitability.
- Applied data validation and cost analysis to pricing inputs, giving ownership a defensible basis for launch pricing decisions.

EDUCATION

Özyeğin University

Istanbul, Türkiye

BSc Industrial Engineering

February 2020 – June 2024

- Degree taught entirely in English; awarded a 40% merit scholarship.
- Academic specialisations (recorded on transcript): Finance; Manufacturing and Service Operations Management; Transportation and Logistics.

ACADEMIC PROJECT

Fibabanka / Özyeğin University — Final-Year Capstone Project

October 2023 – May 2024

- Evaluated server capacity and data-transfer performance for Fibabanka in a six-member team on a university-approved client project, applying Arena Simulation, Excel Solver, genetic algorithms and Java heuristics to generate feasible capacity and processing-time scenarios for operational decisions.
