

FAIZAN TARIQ

OPERATIONS & BUSINESS SYSTEMS ANALYST | PROCESS IMPROVEMENT | REPORTING

Islamabad, Pakistan | +92 333 5566750 | ftariq377@gmail.com | linkedin.com/in/faizan-tariq-59b028254

PROFESSIONAL SUMMARY

Industrial Engineer with hands-on experience across operations, business systems, process improvement, reporting, supply chain and ERP implementation support for organisations in Pakistan, the United States and Türkiye. Currently supports technology and business operations for 59 US restaurant locations while providing part-time financial reporting for 350 US automotive dealerships. Skilled in ERPNext, Jira, advanced Excel, Google Sheets and n8n/Python automation, with prior experience leading a 10-member team. Key outcomes include a 52% reduction in open support tickets and a 40% faster approval cycle.

CORE COMPETENCIES

Operations & Process Improvement: Multi-Location Operations, Operations Management, Process Improvement, Workflow Optimisation, SOP Development, Quality Assurance, KPI Reporting

Business Systems & ERP: ERPNext Configuration, Business Analysis, Process Mapping, Data Migration, User Acceptance Testing (UAT), System Rollout, User Training, Workflow Automation

Reporting & Analytics: Advanced Excel, Dashboard Development, Financial and Operational Reporting, Forecasting, Data Validation, Variance Analysis, Data Visualisation

Coordination & Delivery: Cross-Functional Coordination, Vendor Coordination, Payroll and Billing Operations, Issue Resolution, Process Documentation

PROFESSIONAL EXPERIENCE

AIO APP | Operations Associate

Oct 2025 – Present | Islamabad, Pakistan

- Support POS, kiosk, digital-ordering, menu, payment, payroll, inventory and marketing operations across 59 live restaurant locations for multiple California-based brands.
- Built a live Jira dashboard tracking bugs and feature requests by priority, status, module, product and assignee, enabling priority-based resolution by developers; open tickets fell by 52%, from 350 to 168, between February and June 2026.
- Developed an internal payroll dashboard using Claude Code for 19 restaurants, centralising pay cycles, paydays, approval deadlines, statuses and time-zone conversions; dashboard reporting showed 95% of payroll runs completed on schedule, with remaining delays caused by missing documents or newly added employees.
- Designed and developed a live pizza-ordering interface with real-time visual configuration and dynamic order summaries; deployed at six live restaurants after integration into the POS platform in partnership with product managers and developers.
- Coordinate issue resolution and workflow standardisation across Product, Engineering, Inventory, Finance, Automation and Onboarding; trained three interns on systems, workflows and daily operations.

Coopable | Financial Reporting & Billing Operations Associate (Part-Time)

Nov 2025 – Present | Remote, Pakistan

- Produce and validate 8–10 daily Excel-based financial and invoice reports covering billing, payments, claims and marketing funds for 350 US automotive dealerships.
- Maintain near-100% on-time report completion when source data is available, reconciling reports and resolving discrepancies, variances and data-quality issues before submission.
- Introduced forecasting into client reporting using XLOOKUP, SUMIF, charts and moving averages in response to dealership requests, projecting claims submissions and available marketing funds; this strengthened reporting supported dealership retention and onboarding during a 38% expansion of the dealership base between January and March 2026.
- Document reporting and billing workflows to strengthen consistency, knowledge transfer and operational control.

OneScreen | Supply Chain Analyst

Aug 2025 – Oct 2025 | Islamabad, Pakistan

- Supported a production ERPNext rollout for 5 supply-chain users under senior-manager oversight, covering Inventory, Stock, Payroll, roles and permissions, shipping, tracking and workflow controls.

- Completed data migration, formal user acceptance testing (UAT), system testing, rollout support and user training; configured and tested server scripts for deadlines, reminders, submissions and missing-document checks.
- Built an n8n and Python approval workflow that improved cycle time by 40%, reducing manual processing from approximately five hours to one to three hours.
- Coordinated five vendors across regions, achieving 95% on-time delivery; maintained Shopify catalogues for US online ordering.

SkilledForce | Operations Lead

Dec 2024 – Aug 2025 | Islamabad, Pakistan

- Led daily service delivery for a US-focused career-services business supporting 62 active clients across LinkedIn, CV development, networking and wider career support.
- Managed 10 direct reports and introduced workload allocation, KPI monitoring and weekly reporting through GoHighLevel and Hubstaff, increasing client-handling productivity by 32% between March and June 2025.
- Reduced operating expenses by 15% by eliminating redundant software subscriptions and strengthening spending controls.
- Improved service quality and turnaround through capacity planning, quality checks, client coordination and issue resolution.

ADDITIONAL PROFESSIONAL EXPERIENCE

Facto Investments | Investments Associate

May 2024 – Aug 2024 | Istanbul, Türkiye

- Supported investment analysis, portfolio reporting and client communication for three accounts, improving reporting consistency and operational follow-through.

The Phoenix Practice | Business Analyst Intern

Jun 2023 – Aug 2023 | Islamabad, Pakistan

- Analysed pricing, discounts and service costs for a newly launched dental clinic using data validation, cost analysis and Python scenario modelling; identified a more sustainable balance between customer-acquisition offers and profitability.

ACADEMIC PROJECT

Fibabanka / Özyeğin University | Final-Year Capstone Project

Oct 2023 – May 2024 | Istanbul, Türkiye | University-approved client project

- Worked in a six-member team to evaluate server capacity and data-transfer performance for Fibabanka.
- Applied Arena Simulation, Excel Solver, genetic algorithms and Java heuristics to generate feasible capacity and processing-time scenarios for operational decisions.

EDUCATION

Özyeğin University | Bachelor of Science in Industrial Engineering

Feb 2020 – Jun 2024 | Istanbul, Türkiye | Degree taught in English

- Awarded a 40% scholarship.
- Academic Specialisation Certificates: Finance; Manufacturing and Service Operations Management; Transportation and Logistics.

SYSTEMS & TOOLS

Business Systems: ERPNext, Point-of-Sale Systems, Jira, Asana, Shopify, GoHighLevel, Hubstaff
