PROFESSIONAL SUMMARY

Industrial Engineering graduate with 2+ years in multi-location operations, ERP implementation, financial reporting, and workflow automation for U.S. businesses. Leading a four-person team deploying 6–7 new restaurants per week across a 65-location platform. Raised on-time payroll from 50–60% to 95%, cut menu setup from 6–7 to 2–4 hours, and reduced open support tickets by 35%.

SKILLS

Operations: Implementation & Go-Live, Process Improvement, Quality Assurance, SOPs, KPI Reporting, Vendor Coordination
Systems: ERPNext, POS Systems, KitchenHub, Inventory Management, Requirements Gathering, UAT, Data Migration, Dashboards
Tools: Python, Claude Code, GitHub, Jira, Asana, Advanced Excel, Shopify, GoHighLevel, Hubstaff, Arena Simulation, Excel Solver
Languages: English (Professional Fluency), Urdu (Native)

PROFESSIONAL EXPERIENCE

AIO App (Restaurant Management Technology) <i>Senior Operations Associate</i>	Islamabad, Pakistan Aug 2026 – Present
- Own end-to-end delivery of 6–7 new restaurant accounts per week from post-onboarding through go-live, leading a four-person team through work assignment, training, and quality review. - Take each restaurant live in 2–3 weeks across menu, payroll, catering (where required), marketing, inventory, and third-party delivery platforms (DoorDash, Uber Eats, Grubhub). - Serve as primary owner and escalation point for assigned demo and live restaurants; personally manage key accounts. - Took 12 restaurants live with zero churn to date; resolved menu issues for at-risk accounts to support retention. - Own pre-launch QA across POS, kiosks, online ordering, and KitchenHub, confirming every restaurant works before go-live. - Lead requirements for a new Catering Module: research U.S. catering workflows and define features with product managers. - Built and maintain a web-based dashboard tracking 72 prospect demo accounts, giving sales and leadership real-time visibility.	
Operations Associate	Oct 2025 – Aug 2026
- Raised on-time payroll from 50–60% to 95% across 19 restaurants by building a web-based dashboard with automated alerts. - Cut average menu creation time from 6–7 to 2–4 hours through research and feature requests that drove a menu-tool revamp. - Reduced open support tickets 35% (320 to 208) by building a Jira dashboard segmenting issues by priority, module, and assignee. - Designed and coded a pizza-ordering interface integrated across POS, kiosk, and online ordering with product and engineering; pizza clients grew from 3 to 12 after launch. - Supported POS, kiosk, ordering, payment, and inventory for California brands across U.S. time zones; trained three interns.	
Coopable (Automotive Co-op Reimbursement Services)	Remote
Financial Reporting & Billing Operations Associate (Part-Time Contract)	Nov 2025 – Aug 2026
- Delivered 8–10 daily Excel financial and invoice reports for 350 U.S. dealerships on schedule while the dealership base grew 38%. - Built monthly and quarterly claims and marketing-fund forecasts; analyzed claims by vendor to flag missing submissions. - Reconciled reports and resolved discrepancies before submission; documented end-to-end reporting and billing workflows.	
OneScreen (Interactive Display Technology)	Islamabad, Pakistan
Supply Chain Analyst	Aug 2025 – Oct 2025
- Cut approval cycle time from about 5 hours to 1–3 hours by building a workflow automation in n8n and Python. - Supported ERPNext rollout for five users across inventory, stock, and shipping; ran data migration, UAT, and user training. - Coordinated five regional vendors to 95% on-time delivery and maintained Shopify catalogs for U.S. online ordering.	
SkilledForce (Remote Talent Solutions)	Islamabad, Pakistan
Operations Lead	Dec 2024 – Aug 2025
- Managed 10 full-time direct reports delivering LinkedIn, resume, and career services to 62 U.S. clients; reported to the COO. - Increased tasks completed per week 32% by introducing workload allocation and KPI tracking in GoHighLevel and Hubstaff. - Cut department operating expenses 15% by removing redundant software and managing budgets and reconciliation in Excel.	
Facto Investments (Financial Services)	Istanbul, Türkiye
Investments Associate	May 2024 – Aug 2024
Prepared presentations from senior analysts' market research and trading analysis; presented findings to three client accounts.	

EDUCATION

Özyeğin University — B.S. Industrial Engineering	Istanbul, Türkiye Jun 2024
- Specializations: Finance; Manufacturing & Service Operations Management; Transportation & Logistics. - Capstone (Fibabanka): Evaluated server capacity and data-transfer performance using Arena Simulation and Excel Solver.
